

LIGHTING

LED BULBS

OMNID SERIES A-BULB

The OmniD Series sets an unprecedented benchmark in lumen efficiencies of over 140 lumens per watt. Superior standard Omnidirectional light technology affords uniform lighting distribution not found in standard LED A-bulbs.

Ideal for upgrading from traditional, inefficient CFLs and incandescent bulbs, the OmniD Series delivers a “one product solution” for upgrading all fitting types and environments with vibrant, long lasting light at a fraction of the energy consumption.

FEATURES

- Ultra high efficacy up to 150lm/W
- High power factor
- Shadow-free frosted diffuser
- Traditional globe aesthetics
- Smooth even Omnidirectional light distribution with wide 215° beam angle
